PRESS RELEASE; December 3, 2004, Sacramento, California

America's English Language Tutoring Program by Talking Page™ is an after-school English Language Development (ELD) Tutoring Program designed to meet the No Child Left Behind Supplemental Educational Services scientific research requirements and the State of California Department of Education English Language Development (ELD) Standards, adopted by the State Board of Education. Additionally, the program meets the ELD/ELA Standards Correlation Matrix required by SB 1113 for ELD supplemental materials in the school districts in California.

The "program" uses a neurolinguistic instruction method and the SONO Audio System. The neurolinguistic instruction method is how the brain processes oral and written language. The SONO audio system enables the trained tutor to instruct 25 students in the same manner. The Tutor's Book One is divided into 52 three minute SONO Audio lessons, which teach the sounds of the 26 letters of the English alphabet, the sounds of the 44 common letter combinations of the English alphabet, the spelling of English words by dictation, and the writing of sentences using proper grammar. The Tutor's Book Two continues with 68 lessons of building spelling vocabulary, sentence writing, English grammar instruction, and reading and comprehension tests for grades K-5. The "kit" also contains an English Linguistics pre and post tests, CA standards individual student learning plans, a SONO player model 441 with headphone/microphones, and a tutors travel tote bag.
