TEXT N TONE Inc. has announced that the English Linguistics Teacher's ELD Training Program by Talking Page™ Kit will be available to California school districts participating in the SB 1113 ELD beginning and intermediate student supplemental materials program for 2004-05. The TEXT N TONE program was introduced at the U S Department of Education's Office of English Language Acquisition Summit II, Celebrate Our Rising Stars, in December 2003. The "program" uses a neurolinguistic instruction method and the SONO Audio System. The neurolinguistic instruction method is how the brain processes oral and written language. The SONO audio system enables the teacher to instruct 25 students in the same manner. The teacher's book I is divided into 52 three minute SONO Audio lessons, which teach the sounds of the 26 letters of the English alphabet, the sounds of the 44 common letter combinations of the English alphabet, the spelling of English words by dictation, and the writing of sentences using proper grammar. Teacher's book II continues 68 lessons of building spelling vocabulary, sentence writing, English grammar instruction, and reading and comprehension tests for grades 1-5 and 6-11. The "kit" also contains an English Linguistics pre and post test, Ca. state standards individual student learning plans, a SONO player model 441 with headphone/microphones, a classroom storage box, and a teacher's travel tote bag. The photo shows the teacher's classroom instruction components and storage case. ISBN 09764429-2-2
